

Below are screenshots of my GitHub repository showing the commit history up to the Part1 tag (This will not include the commit to add these screenshots):

The screenshot shows the GitHub web interface for the repository 'ST10336767 / PROG6221POE'. The browser address bar shows the URL 'github.com/ST10336767/PROG6221POE/commits/Part1/'. The page header includes the repository name and a search bar. Below the header, there are navigation links for 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', 'Insights', and 'Settings'. The main section is titled 'Commits' and features a filter dropdown set to 'Part1'. A circular icon with a magnifying glass indicates 'Commits on Apr 14, 2024'. The commit list shows three entries: 'Update README.md' (committed 12 minutes ago, hash 7496199), 'Final Adjustments' (committed 20 minutes ago, hash 5b2ad5b), and 'Global Recipe object' (committed 31 minutes ago, hash 4d40e9f). Each entry includes a commit icon and a code icon.
